Saniflo's Sanicubic 2[®] now rated to IP68 standards

The duplex grinder system can continue to function even if submerged in water

EDISON, NEW JERSEY (April 11, 2017) — [Saniflo USA](#), the worldwide leader in macerating and grinding toilets as well as drain-water pumping systems, has updated the Sanicubic 2[®]. The company's duplex grinder system now has a durable, waterproof enclosure that meets IP68 standards making it possible for the system to remain fully operational if submerged in water.

The Sanicubic 2 is a pre-assembled duplex grinder system designed to handle the waste from multiple bathrooms and fixtures throughout a home or building. The system can handle up to 90 gallons per minute from several fixtures, including a toilet, sink, shower, bathtub, washing machine, etc. This heavy-duty duplex grinder features smart-pump technology, which allows two independently operating grinders to work both alternately and simultaneously for absolute reliability and power. This superior grinding technology eliminates clogging issues, which can result in pipe blockages or damage to grinder pumps, sewage ejector pumps and septic pumps, and thus avoids the need for costly repairs.

“Updating the Sanicubic 2 to IP68 standards gives consumers peace of mind knowing that their unit product is safe and protected should there be an accidental flood,” says Regis Saragosti, CEO of Saniflo USA. “This advancement showcases Saniflo’s commitment to constantly bringing innovative plumbing solutions to the United States.”

The Sanicubic 2 is very simple to install and maintain with its unique above the floor installation. It comes equipped with external audible and visual LED indicator alarms in the event that the pump experiences overload or if either pump ceases to operate.

SFA SANIFLO U.S.A. — whose parent company originated macerating plumbing technology — offers a complete line of waste and drainage pumping systems for residential and commercial applications. Saniflo developed its innovative, “above-floor plumbing” technology more than a half-century ago and has led its commercialization worldwide. Today, the company markets macerating technology through 24 subsidiaries in 50 countries and has sold more than seven million units worldwide since 1958. Saniflo markets through independent sales agents throughout North America, and the product line is currently available at distributor and dealer locations throughout the United States and Canada.
